Summary

Full-stack JavaScript developer focused on building real-world web products with strong emphasis on UI/UX, performance, and scalable architecture. Experienced in developing multi-utility platforms, interactive interfaces, and content-driven applications using React, Next.js, Node.js, and MongoDB.

Technical Skills

Languages: JavaScript, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, GSAP

Backend: Node.js, Express.js

Database: MongoDB

Concepts: REST API Design, Authentication, Modular Architecture, UI/UX Design

Tools: Git, GitHub, Postman, VS Code

Featured Projects

OneTool – Multi-Utility Web Platform

[Live](#) | [GitHub](#)

- Built a centralized web platform offering tools such as JSON Formatter, API Tester, Image Compressor, PDF Generator, and Study Timer
- Designed modular architecture enabling seamless addition of new tools without affecting existing components
- Implemented client-side processing to improve performance and reduce server load
- Developed API testing interface with dynamic request handling and real-time response visualization
- Structured intuitive UI for efficient navigation and smooth user experience

Personal Portfolio – Interactive Developer Experience

[Live](#) | [GitHub](#)

- Designed and developed an interactive portfolio with immersive UI and smooth transitions
- Implemented GSAP-based animations and section-based navigation
- Built non-scrollable dynamic sections for controlled visual flow
- Focused on modern UI architecture including spacing, typography, and motion design

Noorvii Shayari – Content Sharing Platform

[Live](#) | [GitHub](#)

- Developed a content platform for publishing and reading Shayari posts
- Built backend structure using MongoDB and Express for content storage and retrieval
- Designed clean UI optimized for reading and user engagement
- Implemented structured routing and efficient data flow

Other Projects

Reels Food App (In Progress)

[GitHub](#)

- Building a short-video based food discovery platform inspired by modern content consumption
- Designed scalable UI structure for video-based browsing
- Currently implementing backend features and business logic

Development Approach

- Product-focused development with emphasis on real-world usability
- Strong focus on interactive UI and user experience
- Experience in building multi-feature platforms instead of isolated applications

Education Diploma in Electrical Engineering

2022

Goel Institute of Technology and Management, Lucknow

Training Job Ready: AI-Powered Cohort Program

2025

Sheryians Coding School
